

TECHNICAL BULLETIN

No Dipstick? No Problem!

Automatic transmissions without dipsticks don't need to be sent back to the dealer. And despite claims of fill-for-life, they need to be serviced. So how does a service provider do that? If you already have a transmission flush machine, it's as simple as 1-2-3.

1. Verify the OEM recommended service fill and ATF type for your vehicle using the industry's most awarded FREE ATF Conversion Refill Chart, exclusively from LUBEGARD.
2. Perform the flush procedure using your transmission flush machine.
3. Use the recommended LUBEGARD OEM alternative product and follow the directions for advanced transmission protection and performance.

Advanced Transmission Protection

LUBEGARD Platinum®, when added to the recommended DEXRON®/MERCON® ATF, can perform like:
 MERCON® V ATF,
 Honda® Genuine ATF
 Toyota® Type T/TII/TIV
 Mopar® ATF+3® (7176)
 Mopar® ATF+4® (9602)
 And other high friction modified ATF's.

- Save time, space and money!
- Prevents overheating
- Inhibits fluid oxidation and foaming
- Eliminates torque converter shudders, also clutch pack chatters & shudders
- Dramatically reduces friction & wear on metal parts and internal components
- Ensures proper shifts
- Frees stuck valves & keeps them free
- Will not alter the crucial phosphorus or sulfur balance in your transmission fluid
- Will not harm yellow metals
- Ash & zinc free
- LUBEGARD Platinum contains the same patented OEM approved LXE® (Liquid Wax Ester) Technology found in the original LUBEGARD ATF Protectant to provide the absolute best in performance
- LUBEGARD Platinum also contains the patented Synergol® Technology which combined with LXE® Technology provides the most powerful and complete transmission fluid performance additive ever invented.
