SAFETY DATA SHEET

1. Product and Company Identification

Product Name: Kooler Kleen Transmission Flush
Product Code: 19001, 19009, 19111
Product Type: Aerosol
Product Use: Transmission Flush

Manufacturer: International Lubricants, Inc.
Address: 7930 Occidental Ave S
          Seattle, WA  98108
          Phone: (206) 762-5343

Emergency Phone                  Chemtel: (800) 255-3924
                                  (813) 248-0585

NOTE: The information contained herein is accurate to the best of our knowledge. We do not suggest or guarantee that any hazards listed herein are the only ones which exist. We provide this information as guidance for providing personal protection to your employees. The user has the sole responsibility to determine the suitability of the materials for any use and the manner of use contemplated. The user must meet all applicable safety and health standards. We provide this information as guidance for providing personal protection to your employees.

2. Hazard Identification

Classification of substance or mixture:
Extremely Flammable Aerosol Category 1
Gases under pressure Compressed gas
Aspiration hazard Category 1
Eye Irritation Category 2A
STOT – Single Exposure Category 3 (Central Nervous System)

GHS Label elements:

Pictograms

Signal Word: Danger

Hazard Statement(s)
H222 Extremely Flammable Aerosol
H280 Gases under pressure; may explode if heated
H304 May be fatal if swallowed and enters airways
H319   Causes serious eye irritation
H336   May cause drowsiness or dizziness

Precautionary Statements:

Prevention
P210   Keep away from heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking.
P211   Do not spray on an open flame or other ignition source.
P251   Do not pierce or burn, even after use.
P261   Avoid breathing fume/mist/vapours/spray
P264   Wash thoroughly after handling.
P271   Use only outdoors or in a well-ventilated place.
P280   Wear protective gloves/protective clothing/eye protection/face protection.

Response
P301+P310 If Swallowed: Immediately call a poison Center/doctor/physician
P331   Do not induce vomiting
P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P312   Call a poison center/doctor if you feel unwell.
P305+P351 +P338   IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313 If eye irritation persists: Get medical advice/attention.
P403+P233 Store in a well-ventilated place. Keep canter tightly closed.
P405   Store locked up.
P410+P412 Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F
P501   Dispose of contents/container in accordance with local/regional regulations.

3. Composition information on ingredients

4. First Aid Measures

Eye Contact:
Immediately flush with warm water for 15 minutes. Keep eye wide open while rinsing. If irritation persist seek medical attention.
Skin Contact:  
Wash with soap and water. Remove any contaminated clothing and launder before reusing. If irritation persists, seek medical attention.

Inhalation:  
Remove exposed individual to fresh air, protecting yourself. Restore breathing if necessary. Contact a physician.

Ingestion:  
Do not induce vomiting. Get medical attention immediately. Never give anything by mouth to an unconscious person.

5. Fire Fighting Measures

Flash Point:  Flash point of propellant <0 degrees F.

Flammable limits in air, % by volume:  
Upper:  Unknown  
Lower:  Unknown

Extinguishing Media:  
Dry chemical, carbon dioxide, halon, or foam is recommended. Water spray may be used to cool containers or structures. Halon may decompose into toxic materials and carbon dioxide will displace oxygen, take proper precautions when using these materials.

Unusual Fire & Explosion Hazards:  
This material may be ignited by extreme heat, sparks, flames or other ignition sources (static electricity). Vapors are heavier than air and will collect in low areas (sewers) or travel considerable distances. If containers are not cooled in a fire, they may rupture and ignite.

Special Fire Fighting Procedures:  
At elevated temperatures (over 130F) aerosol container may burst, vent or rupture; use equipment or shielding to protect personnel. Cooling exposed containers with streams of water may be helpful. Emergency responders should wear self-contained breathing apparatus. Wear other protective gear as conditions warrant. Keep unauthorized people out and try to contain spills or leaks if it can be done safely. Material will float on water, avoid spreading the fire.

6. Accidental Release Measures

Spill or Leak Instructions  
Contain spill with dikes of soil or nonflammable absorbent to minimize contaminated area. Avoid run-off into storm sewers and ditches leading to waterways. If required, notify state and local authorities. Place leaking containers in well-ventilated area. Clean up small spills by using a nonflammable absorbent or flushing sparingly with water. Contain larger spills with nonflammable diking or absorbent. Clean up by vacuuming or sweeping.

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind; keep out of low areas.
Assess the spill situation, as the spill may not evolve large amounts of hazardous airborne contaminants in many outdoor spill situations. It may be advisable in some cases to simply monitor the situation until spilled product is removed.

### 7. Handling and Storage

**Handling:**

Store below 120°F in cool, dry area, out of direct sunlight and away from strong oxidizers. Do not puncture or burst. Use in accordance with good workplace practices. Use with adequate ventilation. Keep containers closed when not in use. Always open containers slowly to allow any excess pressure to vent. Avoid breathing vapor. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Decontaminate soiled clothing thoroughly before re-use. Destroy contaminated leather clothing.

Empty containers may contain residues from the product. Treat empty containers with the same precautions as the material last contained. Do not cut, weld or apply heat to empty containers. Do not incinerate.

**Storage:**

Store in a cool, dry area, away from heat or direct sunlight. Keep containers closed when not in use. Do not store with incompatible materials.

### 8. Exposure Controls / Personal Protection

**Protective Equipment:**

Use synthetic gloves if necessary to prevent excessive skin contact. Do not wear contacts and always use ANSI approved safety glasses or splash shield.

**Engineering Controls:**

General or dilution ventilation is frequently sufficient as the sole means of controlling employee exposure. Local ventilation is usually preferred. Use a NIOSH approved respirator if ventilation is not adequate to maintain exposures below TLV levels.

**Respiratory Protection:**

Use adequate ventilation to maintain exposure limits. If the exposure limits of the products or any of its components is exceeded, an approved organic vapor mask should be used (consult your safety equipment supplier). Above 1000 ppm, an approved self-contained breathing apparatus or airline respirator with full face-piece is required.

**Other Suggested Equipment:**

Eye wash station and emergency showers should be available. Spill containment equipment should be available.

**Discretion Advised:**

We take no responsibility for determining what measures are required for personal protection in any specific application. The general information should be used with discretion.

9. Physical and Chemical Properties

Appearance: Clear mist as dispensed from aerosol can.
Evaporation Rate: Ether = 1 Slower
PH: NA
Initial Boiling point and boiling range: NE
Flammability: NA
Vapor density >1 (Air=1)
Relative density NE
Partition coefficient: NE
Decomposition temperature: NE
Flammable limits in air, % by volume:
Upper: NE
Lower: NE
Odor: Ether like
Melting/Freezing point: NE
Flash Point: Flash point of propellant <0°F
Vapor pressure: >30 psi
Solubility: negligible
Auto-ignition temperature: NE
Viscosity: NA

10. Stability and Reactivity

Stability: Stable
Conditions to Avoid: Heat, spark, and open flame
Incompatibility: Strong-Oxidizing Agents
Hazardous Decomposition: Combustion will produce Carbon Monoxide, Carbon Dioxide and nitrogen-oxygen compounds.
Hazardous Polymerization: Will not occur

11. Toxicological Information

Component Toxicological Information:

Acute oral toxicity
Light Distillate  LD50 Rat >5000mg/k
Lubegard Kooler Kleen Transmission Flush
Safety Data Sheet
According to OSHA HazCom 2012

Date of issue: March 14, 2014   Revision date: February 13, 2018   Version: 1.2

Dimethylpolysiloxane  LD50 Rat >5,000 mg/kg
Isopropanol  LD50 Rat >5,500 mg/kg

**Acute inhalation toxicity**
Light Distillate  LC50 Rat > 6.8 mg/l 4h
Isopropanol  LC50 Rat >10,000 ppm 6h

**Acute dermal toxicity**
Light Distillate  LD50 Rabbit 2000-4000 mg/kg
Dimethylpolysiloxane  LD50 Rat >2,000 mg/kg
Isopropanol  LD50 Rabbit > 12,800 mg/kg

### 12. Ecological Information

**Isopropanol:**
- Toxicity to fish  LC 50 (pimephales promelas (fatheadminnow)): 9,640 mg/l Exposure 96h
- Toxicity to daphania and Other aquatic invertebrates  EC50 (Daphnia magna (water flea)): . 10,000 mg/l exposure 24h
- No other data

### 13. Disposal Considerations

Do not puncture or burn containers. Give empty, leaking, or full containers to disposal service equipped to handle and dispose of aerosol (pressurized) containers. Dispose of spilled material in accordance with state and local regulations for waste that is non-hazardous by Federal definition. Note that this information applies to the material as manufactured; processing, use, or contamination may make this information inappropriate, inaccurate, or incomplete.

Note that this handling and disposal information may also apply to empty containers, liners and rinsate. State or local regulations or restrictions are complex and may differ from federal regulations. This information is intended as an aid to proper handling and disposal; the final responsibility for handling and disposal is with the owner of the waste. See Section 9 - Physical and Chemical Properties.

### 14. Transport Information

Aerosols (limited quantity),  
Class 2.1, ERG 126  
AIR (IATA)

Aerosols (limited quantity),  
Class 2.1, ERG 126, UN No. 1950  
Vessel
Aerosol (Limited Quantity), Class 2.1, UN No 1950

### 15. Regulatory Information

Environmental Regulations
SARA 302/304: None

SARA 311/312: Immediate (x) Delayed ( ) Fire (x) Reactive ( ) Sudden Release of Pressure (x)

Section 313
This product contains: None reportable

California Prop 65
None

All the chemicals used in this product are TSCA listed.
Check with your local regulators to be sure all local regulations are met.

16. Other Information

Hazard ratings This information is intended solely for the use of individuals trained in the NFPA and/or HMIS systems.

NFPA: Level 3 Aerosol

HMIS: Health: 2 Flammability: 4 Reactivity: 0

RATING: 4-EXTREME  3-HIGH  2-MODERATE  1-SLIGHT  0-INSIGNIFICANT

Note: For industrial use only. The information contained herein is accurate to the best of our knowledge. We do not suggest or guarantee that any hazards listed herein are the only ones which exist. We make no warranty of any kind, express or implied, concerning the safe use of this material in your process or in combination with other substances. Effects can be aggravated by other materials and/or this material may aggravate or add to the effects of other materials. This material may be released from gas, liquid, or solid materials made directly or indirectly from it. User has the sole responsibility to determine the suitability of the materials for any use and the manner of use contemplated. User must meet all applicable safety and health standards. Possession of an SDS does not indicate that the possessor of the SDS was a purchaser or user of the subject product.
